Sirjan Nishad

sirjannishad74@gmail.com | LinkedIn | GitHub | LeetCode

Career Objective

A dedicated software engineering student with strong problem-solving skills and hands-on experience in building full-stack and AI-powered systems. Passionate about developing meaningful solutions that blend technical excellence with real-world impact. Actively seeking internship opportunities to contribute and grow in a collaborative engineering environment.

Education

Pranveer Singh Institute of Technology — Kanpur, India
B.Tech – Artificial Intelligence and Machine Learning — *Oct 2023 – Aug 2027*

Guru Nanak Modern School — Kanpur, Uttar Pradesh
12th Standard, CBSE – Percentage: 75.2% — *Mar 2022*

Guru Nanak Modern School — Kanpur, Uttar Pradesh
10th Standard – Percentage: 79% — *2020*

Projects

Messenger App | *Real-Time Chat Communication Platform* | GitHub

- Built a full-stack real-time messaging platform with a modern UI, supporting fast and secure communication between users.
- Implemented secure user authentication with encrypted login, session handling, and protected chat routes using Flask.
- Integrated REST APIs with a MongoDB database for real-time chat storage and user management, enabling persistent message history.
- Used Socket.io for bidirectional, event-driven real-time communication between clients and the server.
- **Tech Stack:** Python, Flask, REST APIs, HTML, CSS, JavaScript, MongoDB, Socket.io, Git

VoteBuddy | *Personalized Voting Support App*

- Designed and developed a civic-tech web application that helps citizens make informed voting decisions through personalized guidance and candidate insights.
- Created a MyVotePlan engine that generates a personalized voting plan based on user preferences and priorities.
- Built a mobile-friendly, accessible UI with real-time answers via text or speech using Responsive Design principles.
- **Tech Stack:** HTML, CSS, JavaScript, Flask, REST APIs, OpenAI, Git

Urban Mobility AI | *LLM-Based Intelligent Transportation System (Research – In Progress)*

- Developing an LLM-powered urban mobility intelligence system that transforms large-scale transportation data into explainable and actionable insights for smart city applications.
- Designed a Retrieval-Augmented Generation (RAG) pipeline integrating NYC Taxi datasets with Large Language Models for accurate, data-grounded reasoning with reduced hallucination.
- Implemented a tool-augmented AI architecture using LangChain and agent-based workflows for demand analysis, trip distance estimation, and mobility pattern discovery.
- **Tech Stack:** Python, LLMs (LLaMA, Qwen, DeepSeek), LangChain, RAG, NLP, Pandas, NumPy, Git

Wanderlust India | *Travel Exploration Platform* | GitHub

- Developed a travel discovery platform to help users explore India's culture and destinations through curated content and an interactive, responsive user experience.
- **Tech Stack:** HTML, CSS, JavaScript, Responsive Design, Git

Skills

Programming Languages: Java, Python, JavaScript

Frontend: HTML, CSS, JavaScript, Responsive Design, React (Basic)

Backend: Flask, REST APIs, Socket.io

Databases: MongoDB, MySQL (Basic)

AI / ML: Machine Learning, Deep Learning, NLP, LLMs (LLaMA, Qwen, DeepSeek), Retrieval-Augmented Generation (RAG), LangChain, OpenAI API

Data & Analytics: Pandas, NumPy, Data Analysis

Tools & Platforms: Git, GitHub, VS Code, LeetCode

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Cloud: AWS (Cloud Practitioner)

Certifications

- Career Essentials in Generative AI – Microsoft & LinkedIn — Oct 2024
- AWS Cloud Practitioner Essentials – Amazon Web Services — Aug 2025

Activities & Achievements

- **Zero Boundaries Hackathon 2025 – Winner.** Led the team behind **VoteBuddy**, a secure and accessible voting platform, combining innovation with strong problem-solving skills. — 2025
- **NASA Space Apps Challenge 2025 – Team Member.** Earned the *Galactic Problem Solver* certificate for contributing to the **PlastiSat** project – combining NASA Earth observation satellite data with AI and image processing to track marine plastic-waste accumulation zones. — 2025
- **LeetCode Contest Rating: 1590 / Top 24.5%.** Solved 90+ coding problems focused on Data Structures & Algorithms, demonstrating consistent algorithmic thinking and problem-solving growth.

Additional Information

Languages: English, Hindi
